

# CODING FOR CONFIDENCE

## Module 3: Girls Style

**Overview:** In this session, teams will style the web pages they coded in the previous session. Teams will continue to engage in team building activities to develop their interdependence and enhance their communication and collaboration skills by lifting the Paired Programming to the next level. Teams will explain technical procedures using plain language or pseudo code. Then during our CODE ALONG teams will explore classes and ID's, and how these are helpful to their purpose and what they want to edit. They will have time to experiment with backgrounds, text color, fonts, text sizes, and alignment to enhance their webpage design.

**Materials (Advanced Prep):** devices (one for each participant), Handouts: Coding Chronicle 3

**Welcome:** Greeting and Ice Breaker (Getting to Know You)

**Query:** How can Girls Style their pages?

**Activate Your Heart** with our Daily Affirmation - Lift others up while you climb (Amber Hikes)

**Word of the Day:** PERSIST

**Session Preparation ("Do Now"):** participants sign in to repl.it using their Google Account

**View:** empowerment video - Amber Hikes

**Team Building:** Pair Programming Shared Writes, Technical/Procedural Writing (How-To) use writing to explain steps or pseudo code.

### Coding Workshop:

Introduction Styling Your Web Page (embedded vocabulary, Classes and ID's, helpful to categorize elements on the page)

Interactive CODE ALONG Add style by coding backgrounds, text color, fonts, text sizes, and alignment.

Experiment with adding style to your design or explore new ways to code.

**Confidence Affirmation:** Lift others up while you climb (Amber Hikes)
