

CODING FOR CONFIDENCE

Module 5: Girls Take Action

Overview: In this session, teams will explore different actions they can code to complete useful tasks. Teams will continue to engage in team building activities to develop their interdependence and enhance their communication and collaboration skills by lifting the Paired Programming to collaboratively write a program while sharing a single device. Programmers will alternate the role of being the “hands” and the “eyes.”. Then during our CODE ALONG teams will explore coding to add actions to pages including Click, Flip a Coin, Basic Response, and revisiting the Number Guesser from Module 1. Teams will have time to experiment with ways to incorporate actions in their web page design.

Materials (Advanced Prep): devices (one for each pair/team), Handouts: Coding Chronicle 5

Welcome: Greeting and Ice Breaker (Getting to Know You)

QUERY: How can Girls Take Action?

Word of the Day: ACTION

Activate Your Heart with our Daily Affirmation - We make a difference

Session Preparation (“Do Now”): participants sign in to repl.it using their Google Account

Team Building: Pair Programming Take turns with the role of being the “hands” and the “eyes” while programming together. Teams share 1 device, and each programmer has only half of the directions. They will alternate through odd and even steps, cooperating and communicating to complete their program. This will be useful to the final project and is the format teams will follow for collaborative coding during the Hack-a-Thon.

Coding Workshop:

Introduction Actions (embedded vocabulary, continue to explore how things happen using prewritten functions)

Interactive CODE ALONG Basic actions Click, Flip a Coin, Basic Response, Number Guesser

Experiment with adding actions to your design or explore new ways to code.

Confidence Affirmation: We make a difference
