

CODING FOR CONFIDENCE

Girls Hack (a-thon)

Overview: In this culminating session, teams will apply their learning to solve a real world problem in our CODING FOR CONFIDENCE HACKATHON. Teams will apply their communication and collaboration skills, as well as their technical skills. Teams will use Paired Programming to code their solution. Programmers will alternate the role of being the “hands” and the “eyes.”. Teams will select actions and attributes learned in the previous modules that will best solve their challenge.

Materials (Advanced Prep): devices (one for each pair/team), Handouts: Hackathon Coding Chronicle

Welcome: Girls Powered Music Playing, Challenge projected

Query: How can Girls Hack?

Word of the Day: Persevere

Activate Your Heart with our Daily Affirmation – I believe in me. I believe in you.

Session Preparation (“Do Now”): participants sign in to repl.it using their Google Account

View: Challenge Launch Slideshow

Team Building: Brainstorm Which tools and actions will best support the creation of this solution?

Hackathon:

Introduction Present Challenge and constraints:

Option 1: Design a girl-powered website for a girls coding club

Option 2: Design a website to empower other girls using inspirational quotes

Starter code for both projects is available on the CODING FOR CONFIDENCE website
Brainstorm - which tools and actions will best support creation of this solution.

Paired Programming Teams work together to code their solution.

Present Teams present their solution to the mentors. Teams are evaluated based upon teamwork, empowering support, and how to have applied their technical learning to their final product.

Post Survey

Confidence Affirmation: I believe in me. I believe in you.
