

CODING FOR CONFIDENCE

Module 6: Girls Level Up

Overview: In this session, teams will extend their work exploring different actions they can code to complete useful tasks. Teams will continue to engage in team building activities to develop their interdependence and enhance their communication and collaboration skills. Teams will use **Paired Programming** to brainstorm and record ideas for using coding to solve a real world problem while sharing a single device. Programmers will alternate the role of being the “hands” and the “eyes.”. Then during our **CODE ALONG** teams will go deeper exploring coding to add actions to pages including Click, Flip a Coin, Basic Response, and revisiting the Number Guesser from Module 1. Teams will have time to experiment with ways to incorporate more advanced actions in coding.

Materials (Advanced Prep): devices (one for each pair/team), Handouts: Coding Chronicle 6

Welcome: Greeting and Ice Breaker (Getting to Know You)

Query: How can Girls Level Up?

Word of the Day: **EXTEND**

Activate Your Heart with our Daily Affirmation - Curiosity helps us level up

Session Preparation (“Do Now”): participants sign in to repl.it using their Google Account

Team Building: **Pair Programming** Take turns with the role of being the “hands” and the “eyes” while brainstorming together. Teams share 1 device, and each programmer takes turns sharing and recording ideas as they brainstorm solutions to a real world problem. This will be the format teams will follow for collaborative coding during the Hack-a-Thon.

Coding Workshop:

Introduction Extending Actions (embedded vocabulary, continue to explore how things happen using prewritten functions)

Interactive **CODE ALONG** Extended actions Click, Flip a Coin, Basic Response, Number Guesser

Experiment with adding actions to your design or explore new ways to code.

Confidence Affirmation: We level up
